Art Unit: 1625

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 6, 9, 18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Lombaert et al US 5,550,119 taken with, Seido et al US 5,801,271.

De Lombaert et al US 5,550,119 and Seido et al US 5,801,271 are applied as in the last office action. Applicant's comments have been noted and considered with the following effect. The comments are drawn to subject matter, namely -O-R₆ groups that do not have basis in the claims as presently recited.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1, 6, 9, 18 and 20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly

connected, to make and/or use the invention. The -O-R₆ linkage referred to in applicants' response is not enabled. The claims do not recite the -O- linkage.

No claim is allowed.
